Education

Plan

| year | Institution |
|-----------------------|---------------------------------------------------------------|
| 2015 - 2022 | Imperial Academy High school diploma |
| 2023 - Present | AAU University Bachelor of Science in Software Engineering |
| 2024-present | Evangadi Tech certifications on full-stack web development |

I plan to pursue further education in areas like artificial intelligence or machine learning to expand my expertise.

Each project in my portfolio represents a step forward in my journey as a software engineer. I've continuously challenged myself to learn and apply new technologies.

My Works

Each project in my portfolio represents a step forward in my journey as a software engineer.

Puppy page project

My first web page built with HTML and CSS where I explored how html and css work together.

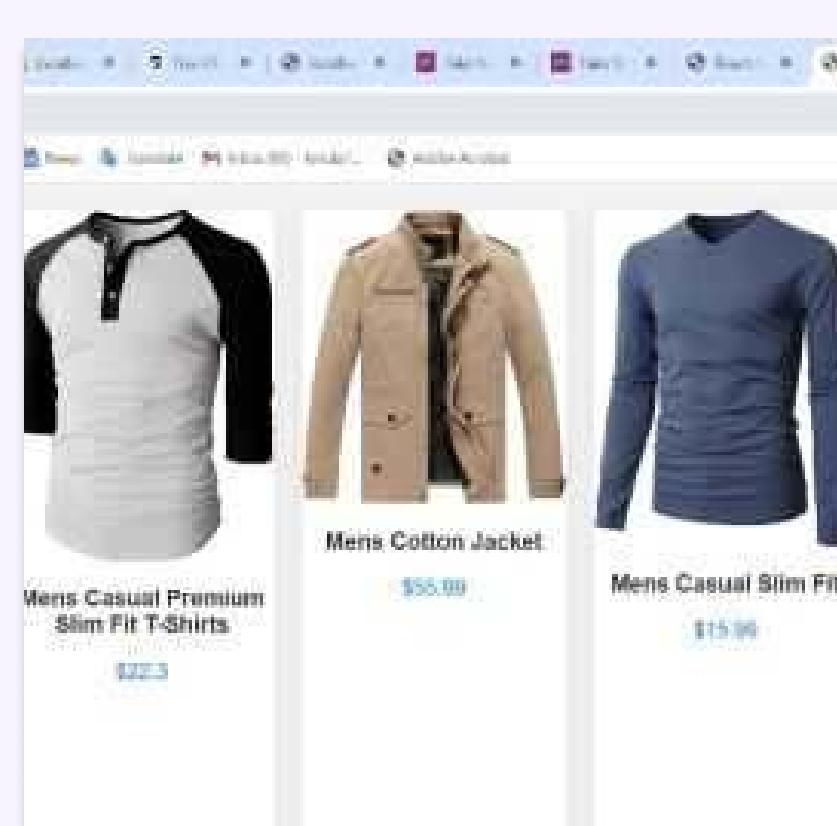

Apple home page

I recreated apple's home page with only html and css further enhancing my knowledge in html and css.

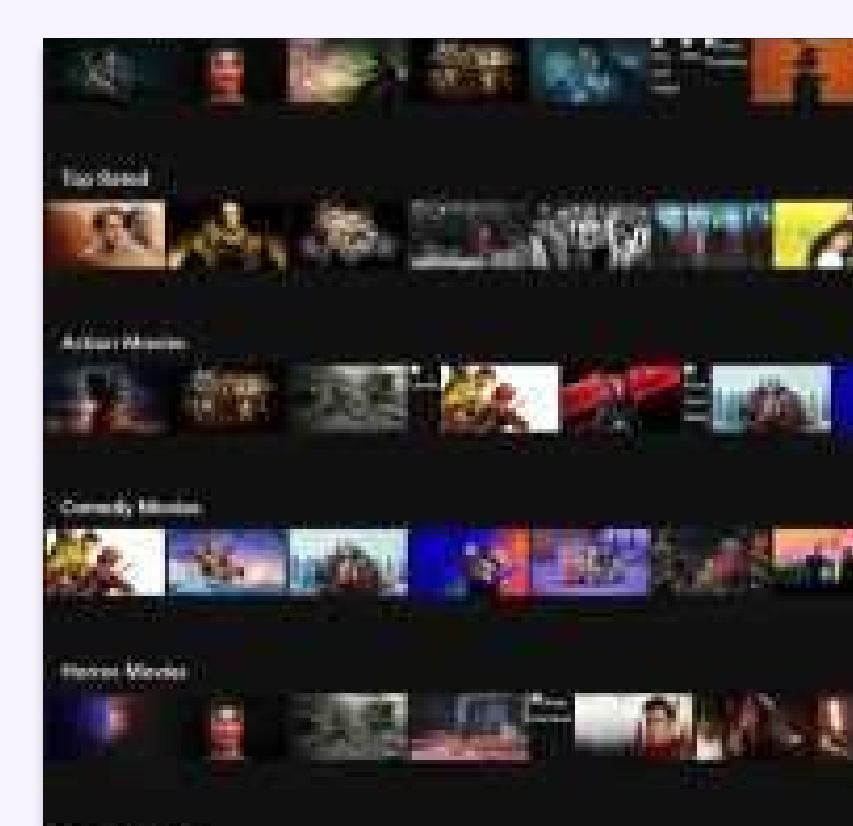

Bootstrap project

I build the following page using only bootstrap features without using any custom css.

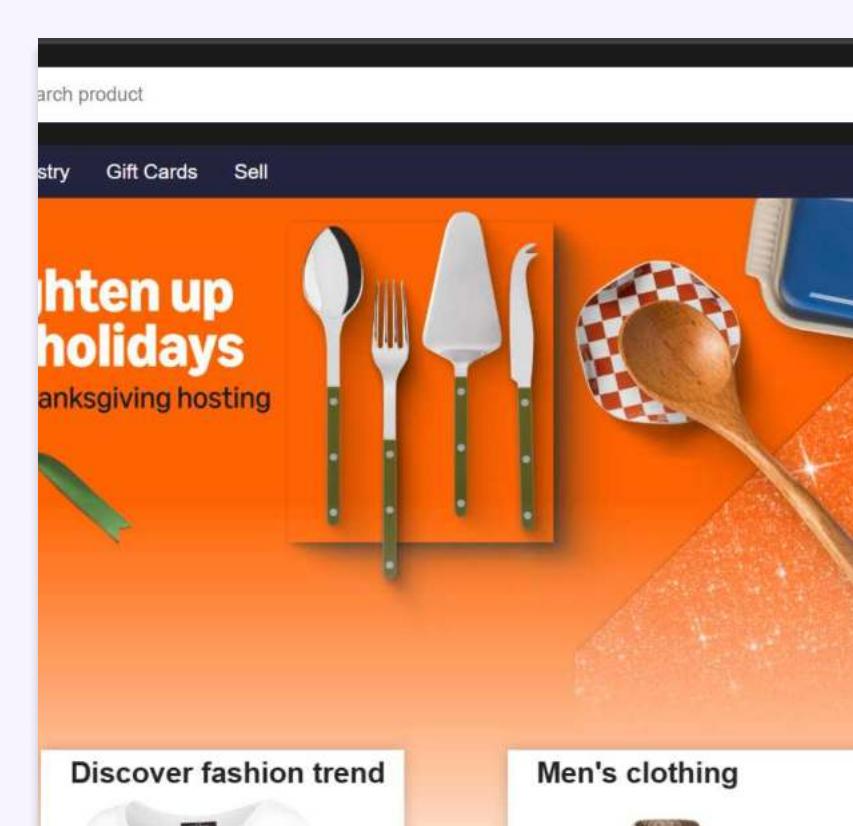

sample API integration

I tried to retrieve product items which are used for trial from <https://fakestoreapi.com> and integrate it to my page.

Netflix_clone Project

Trying to recreate Netflix website by using react, The movie api and other tools that I have learned into one place.

Amazon_clone Project

Trying to create Amazon website by using react, and by incorporating a bit of backend .

My Hobbies

Drawing

I love sketching it's always been a way for me to bring the characters I create to life and a way to represent the world. Creating characters, landscapes, and abstract designs helps me relax and sparks my creativity. Through drawing, I've developed a deeper appreciation for the details and beauty in the world around me. My sketches often reflect the emotions I feel or the stories I want to tell, making each piece uniquely personal.

Philosophy

Philosophy captivates me because it challenges me to think critically

and ask big questions about life, existence, and morality. I've enjoyed

exploring existentialist ideas from thinkers like Sartre and Nietzsche,

which have influenced how I approach challenges. Philosophy not only

sharpens my reasoning but also inspires me to seek meaning in my work

and relationships.

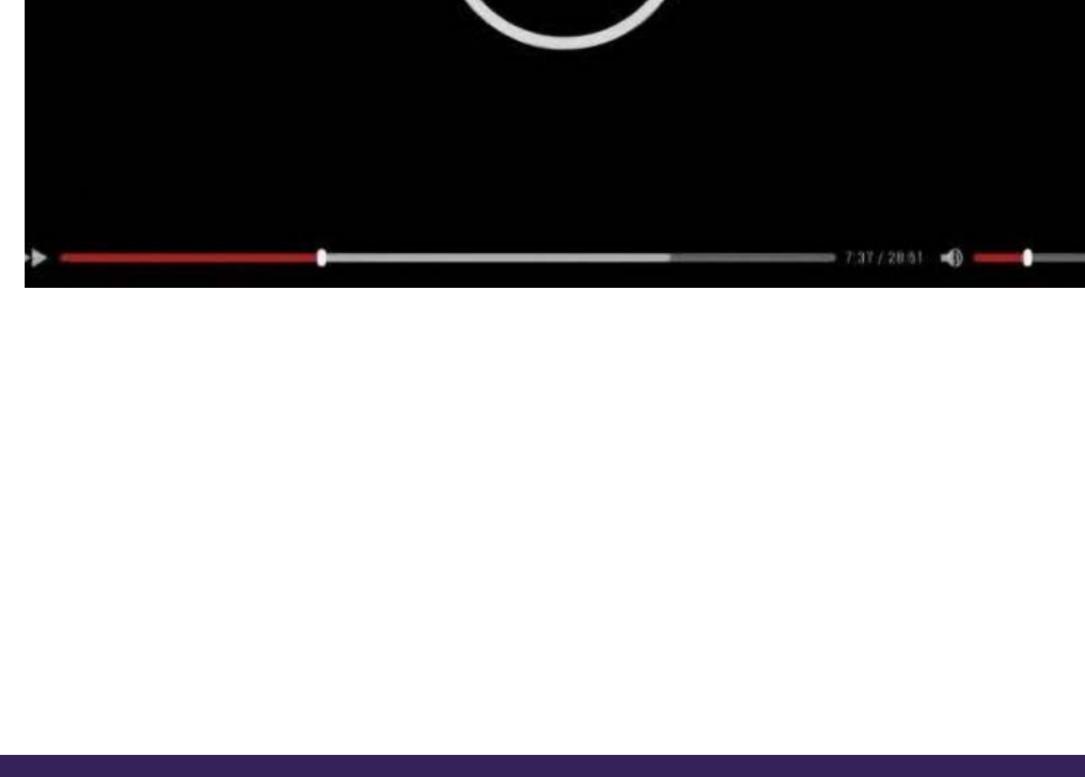

I find inspiration in the works of great thinkers like Plato, Aristotle, Nietzsche, and Kierkegaard. Their ideas challenge me to look beyond the surface and examine the "why" behind everything. Their way of thinking and philosophy has taught me to embrace curiosity and open-mindedness.

"The ultimate form of preparation is not planning for a specific scenario, but a mindset that can handle uncertainty."

– James Clear

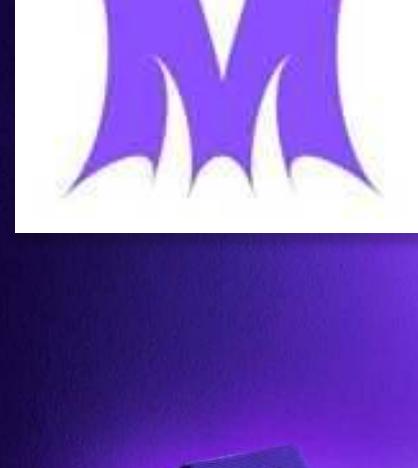

Reading Manga

Reading manga, which is comics made in Japan, has always been a source of inspiration for me, with its incredible storytelling and breathtaking art. Series like One Piece and Attack on Titan have left a lasting impression, teaching me about resilience and emotional depth. I especially love action-packed stories and heartfelt romances that explore deep themes.

Celebration

Timket is more than just a celebration—it's a cultural and spiritual adventure that immerses you in the heart of Ethiopia's traditions. Whether you're drawn to its religious significance, the vibrant processions, or the opportunity to connect with locals, Timket offers an unforgettable experience.

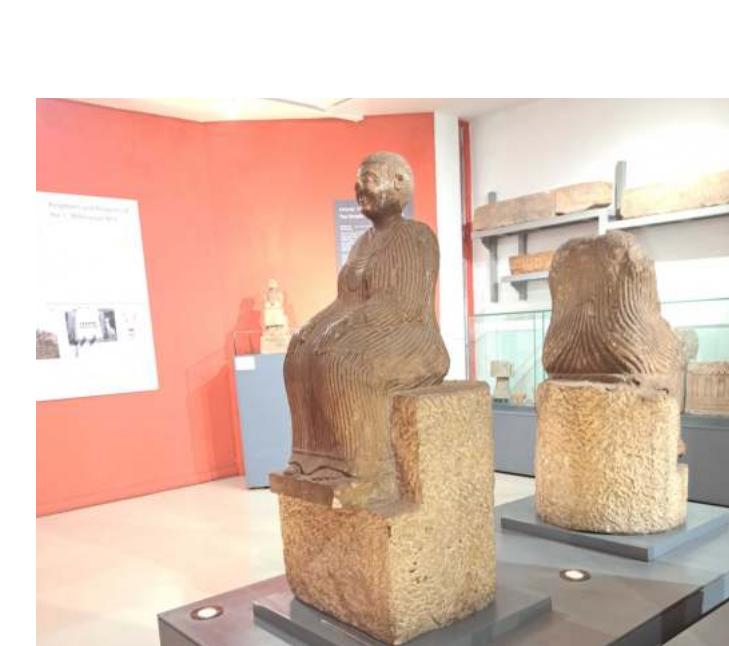

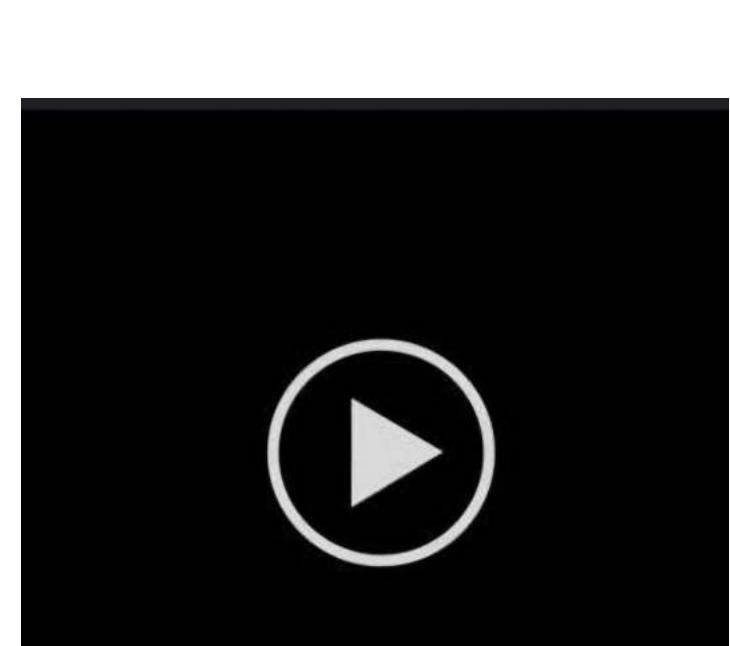

Meskel is more than just a celebration—it's a cultural and spiritual adventure that immerses you in the heart of Ethiopia's traditions. Whether you're drawn to its religious significance, the vibrant processions, or the opportunity to connect with locals, Timket offers an unforgettable experience.

It was a sunny day when my parents decided to take our family to kuriftu water park, Located in Bishoftu, just a short drive from Addis Ababa.though we didn't know at the time. I was not that interested at first but we still went their and it turns out to be one of the best times of my life.
